Maribor, 22.10.2007

To whom it may concern,

I have worked with the team of experts from RR Knowledge Centre Ltd, as they have taken on the role of administrative and financial coordinator of our FP7 project in the field of medicine.

As the administrative financial coordinators they have had an immense contribution in the preparation of project proposal stage already. The dedication of the entire team and their professionalism are to be admired. Not only have they taken off a big burden of our shoulders, so that we can get on with the scientific work, they have also carried out their task to the highest possible quality level.

I sure hope the project proposal is approved, as I am looking forward to working with the RR team again.

Best regards,

Nevenka Krčevski Škvarč
