

Letter of reference

Dear Madam/Sir,

We are using EFAMT internet application for a full three years ever since it came on the market. By using EFAMT we have ensured a complete overview of the costs of all of our projects in real time. We manage projects according to the sources of financing and we are obliged to report to the contracting authority in the same way. There it is crucial for us to have an application which enables us to do analysis based on the sources of financing. EFAMT enables us to do just that.

Because we are receiving the cost overview in real time this means that we can monitor the status of the entire organisations project on a daily basis.

The operation of the highly capable EFAMT application runs smoothly.

Because of the specific need of our organisation we have agreed with RR & CO. Ltd. for some additional features of the EFAMT application. The experts at RR & CO. Ltd. have been able to answer all of our requests, questions and queries on a high professional level, the services were always delivered on time agreed upon and in line with our highest expectations.

Our satisfaction with the high quality professional level of services enables us to be able to recommend EFAMT to governmental organisations managing project which are financed from several different sources.

Yours faithfully,

General Manager of Centre for restoration
Jernej Hudolin
